

IN THE ABSTRACT:

Kindly amend the abstract as follows:

~~Provided a~~ A patch activated in use capable of uniformly activating a drug by supplying a solution when used is provided. The patch activated in use comprises an absorber [[11]] containing a dry drug [[10 and]] which is formed of a material capable of absorbing a liquid, and a wall material [[13]] arranged around the absorber, the wall [[11 and]] having an adhesive layer [[12]] on the lower surface thereof[, a]. A support is [[15]] arranged on the absorber [[11]] and the wall material, [[13 and]] having an opening [[14]] at the center thereof, a diaphragm is [[20]] arranged on the support [[15]], and a dissolution liquid reservoir [[18]] is arranged on the diaphragm, [[20,]] The dissolution liquid reservoir retains ~~holding~~ a dissolution liquid having ~~dissolving~~ the drug dissolved therein in a space with the diaphragm, [[20]] and has ~~having~~ a protruding portion [[17]] which breaks the diaphragm [[20]] by exerting pressure thereon. The protruding portion [[17]] has a liner top end portion, and is arranged in contact with or in [[the]] proximity [[with]] to the diaphragm [[20]]. A liner [[19]] is detachably provided on the lower surface of the absorber [[11]] and adhesive layer [[12]].
